From: To:

B.   Carbon dioxide equivalent declaration (section 4(2) of Carbon Tax Act, 2019, methodology):

B.1 Emissions factor: $\{(C \times 1) + (M \times 23) + (N \times 296)\} \times Y = X$

B.1.1 Use the prescribed Schedule for Carbon Tax Fugitive Emission Factors to calculate the Emission factor in Carbon Dioxide equivalent per tonne (X):

	Source	C	M	N	Y	X
IPCC Code	Activity	CO_2	CH_4	N_2O	The number 1000	Emission factor in Carbon Dioxide equivalent per tonne
Totals						

Note: If space is insufficient, complete an annexure sheet.

B.2 Emissions equivalent: $(N \times Q) = F$

B.2.1 Use the Total of N (mass in tonne) multiplied by total of X (Emission factor) to calculate the Emissions Equivalent (F):

N	X	F
Total mass in tonne (N)	Emission Factor (Q)	Emissions Equivalent (F)

C.   The Emissions Equivalent figure as reflected in this DA180.01B.1 represented by F as above must be added with the DA180.01B.2 figure F and the sum thereof must be carried forward to the DA 180 section B3 (front page) to be inserted in the Total Fugitive Emissions field represented by F.
