

## DRAFT INTERPRETATION NOTE

DATE:

**ACT : INCOME TAX ACT NO. 58 OF 1962 (the Act)**

**SECTION : SECTION 11(d)**

**SUBJECT : DEDUCTION OF EXPENDITURE INCURRED ON REPAIRS**

### *Preamble*

In this Note unless the context indicates otherwise –

- “**section**” means a section of the Act; and
- any word or expression bears the meaning ascribed to it in the Act.

### **1. Purpose**

This Note provides guidance on the interpretation and application of section 11(d) which allows a deduction for expenditure incurred on repairs for the purposes of trade.

### **2. Background**

Expenditure on repairs to an asset not comprising trading stock is likely to be of a capital nature, particularly when it is not incurred at regular intervals.<sup>1</sup> This is because the expenditure relates to the protection of a capital asset.<sup>2</sup>

Expenditure of a capital nature does not qualify as a general deduction under section 11(a). Nevertheless, section 11(d) makes provision for the deduction of expenditure incurred on repairs for the purposes of trade provided the requirements are met.

For purposes of section 11(d) it is important to distinguish between a “repair” and an “improvement” since only expenditure incurred on repairs is deductible under section 11(d). No hard and fast rules can be provided for this distinction. Each case must be decided on its own facts.<sup>3</sup>

---

<sup>1</sup> In *Rhodesia Railways Ltd v Collector of Income Tax Bechuanaland* 1935 AC 368, 6 SATC 225 the court held that the periodic replacement of railway lines was not of a capital nature.

<sup>3</sup> *Flemming v KBI* 1995 (1) SA 574 (A), 57 SATC 73 at 75 and 79.

### 3. The law

#### Section 11(d)

**11. General deductions allowed in determination of taxable income.**—For the purpose of determining the taxable income derived by any person from carrying on any trade, there shall be allowed as deductions from the income of such person so derived—

- (d) expenditure actually incurred during the year of assessment on repairs of property occupied for the purpose of trade or in respect of which income is receivable, including any expenditure so incurred on the treatment against attack by beetles of any timber forming part of such property and sums expended for the repair of machinery, implements, utensils and other articles employed by the taxpayer for the purposes of his trade;

### 4. Application of the law

Section 11(d) provides for the deduction of expenditure actually incurred during the year of assessment on repairs of –

- property occupied for the purposes of trade or from which income is receivable, including the treatment against attack by beetles of timber which forms part of such property; or
- machinery, implements, utensils and other articles employed by the taxpayer for the purposes of trade.

The first category mentioned above refers to repairs effected to immovable property and the second category to repairs pertaining to movable property.

No deduction for expenditure incurred on repairs will be permissible if the expenditure is recoverable.<sup>4</sup>

#### 4.1.1 The meaning of “repairs”

In order to determine whether an expense will constitute a repair it is necessary to establish the meaning of the word “repairs” as used in section 11(d). The Act does not contain a definition of the word “repairs” and it must, therefore, be given its ordinary grammatical meaning.

The *New Shorter Oxford English Dictionary*<sup>5</sup> defines a “repair” as follows:

“Restore (a structure, machine, etc) to unimpaired condition by replacing or fixing worn or damaged parts; mend.”

*Collins English Dictionary*<sup>6</sup> defines a “repair” as –

“[t]o restore (something damaged or broken) to good condition or working order”.

Various court cases have considered the meaning of the word “repairs” extensively and produced relevant principles.

<sup>4</sup> Section 23(c).

<sup>5</sup> Clarendon Press Oxford, fourth edition, 1993, volume 2.

<sup>6</sup> Harper Collins Publishers, fifth edition, 2000.

The Supreme Court of Appeal analysed the dictionary meaning ascribed to the word “repair” in *Flemming v KBI*.<sup>7</sup>

From this analysis the court concluded that “repair” involves the process of renewing, renovating or restoring decayed or damaged parts.<sup>8</sup> The court held that a deduction under section 11(d) will only be available if the original structure was in need of repair.<sup>9</sup>

In ITC 491<sup>10</sup> it was held that in the ordinary sense of the word, “repairs” means replacement or renewal of something that has become defaced or worn out or worn down by use or possibly by wear-and-tear.

In ITC 617<sup>11</sup> various court cases were reviewed from which the following principles emerged:

- Repair is restoration by renewal or replacement of subsidiary parts of the whole. Renewal as distinguished from repair is reconstruction of the entirety, meaning by the entirety not necessarily the whole but substantially the whole subject matter under discussion.
- In the case of repairs effected by renewal it is not necessary that the materials used should be identical with the materials replaced.
- Repairs are to be distinguished from improvements. The test for this purpose is – has a new asset been created resulting in an increase in the income-earning capacity or does the work undertaken merely represent the cost of restoring the asset to a state in which it will continue to earn income as before?

In ITC 626<sup>12</sup> it is mentioned that these tests are not exhaustive but are merely of assistance to the general enquiry. It is necessary in each case to determine whether or not what has been done actually constitutes “repairs” in the ordinary meaning of the word, and the extent to which it falls under that heading.

It is immaterial whether repairs occur as a result of some fortuitous act, such as a storm or fire, or as a result of the wearing out, damage or deterioration of an asset by use. Restoration involves a renewal or replacement of subsidiary parts of the structure and the expenditure incurred will be deductible. However, if the damage is of such an extent that the asset is partially destroyed, one would then have to look at whether the repair or renovation is a reconstruction of the entire asset, in which case the expenditure will not be deductible. To the extent that the cost of repairs is

<sup>12</sup> (1946) 14 SATC 530 (U).

recoverable under a policy of insurance the deduction will be prohibited by section 23(c).<sup>13</sup>

#### 4.1.2 The meaning of “maintenance”

The *Concise Oxford English Dictionary*<sup>14</sup> defines “maintenance” as –

“[t]he process or state of maintaining or being maintained”;

and defines “maintain” as –

“[c]ause or enable (a condition or state of affairs) to continue, keep at the same level or rate; keep (a building, machine, etc.) in good condition by checking or repairing it regularly”.

In *Heerman’s Supermarket (Pty) Ltd v Mona Road Investments (Pty) Ltd*<sup>15</sup> van Heerden J considered the meaning of the words “repair” and “maintenance” within a lease agreement and whether the wide dictionary meaning of the word “repair” was wide enough to cover “maintenance”. The lessor claimed it was liable for repairs but not maintenance under the provisions of the lease agreement. The court found that the word “repairs” was capable of covering “maintenance”.

In *Clanwilliam Municipality v Braude*<sup>16</sup> the court expressed the view that –<sup>17</sup>

“[t]he words “maintenance” and “repair” have “connotations which differ in accordance with the objects and circumstances to which they are applied”.

The court accepted in *Natal Motor industries Ltd v Crickmay*<sup>18</sup> what was said at 859 by Donovan J in *Reilly v British Transport Commission*,<sup>19</sup> that –<sup>20</sup>

“the terms ‘repair’, ‘maintenance’ and ‘adjustment’ are not mutually exclusive. One cannot, therefore, by describing some operation as ‘maintenance’ or ‘adjustment’, exclude the possibility that it is also a ‘repair’ ”.

The court held that –<sup>21</sup>

“[t]he whole object of “free service” is to ensure that the car is maintained in good working order and condition by doing such limited repair work as is necessary to keep or place it in good working order and condition”.

#### 4.1.3 Maintenance deductible as repairs under section 11(d)

Expenditure incurred on maintenance will be deductible under section 11(d) provided it complies with the essential elements of a repair and the other requirements of that section.

Maintenance requires keeping the asset in good working order and condition which implies that it has become defaced or worn out or worn down by use or possibly by

<sup>20</sup> Above at 97.

<sup>21</sup> Above at 98.

wear-and-tear, a requirement considered by the courts that meets the broader meaning of repairs.<sup>22</sup>

#### 4.1.4 Repairs in relation to the entire property

In judging whether a renewal or repair has been carried out, regard must be had to the extent of the restoration work in relation to the entire property of which the portion restored forms a part. The greater the restoration work in relation to that entirety, the less likely it is that a repair has taken place.<sup>23</sup>

However, it does not follow that the replacement of a subsidiary portion necessarily leads to the conclusion that the property has been repaired and not improved.

#### 4.1.5 Distinction between repairs and improvements

In view of the sometimes narrow distinction between “repairs” and “improvements”, there are a variety of cases on this subject which are not always consistent. However, the following general principles have emerged:

- Has a new asset been created resulting in an increase in the income-earning capacity or does the work undertaken merely represent the cost of restoring the asset to a state in which it will continue to earn income as before?<sup>24</sup>
- Unless the structure or article on which repairs are deemed to have been done was damaged or had deteriorated and replacement was required, no repair for the purposes of section 11(d) has taken place and no further inquiry need be made. Replacing something which is serviceable solely for aesthetic reasons, or in order to improve the service provided is not a repair.<sup>25</sup>
- Materials used for the repair need not be identical to the original materials that are being replaced. As long as the purpose of the work is to restore the asset to its original condition, as distinct from creating an improvement, the work constitutes a repair. The fact that new materials are substituted for the old at a greater cost than would have been incurred had the same materials been used is not relevant. Each situation must be decided on its own merits in order to determine whether the use of new materials is for the purpose of improvement or merely for the purpose of restoring the asset to its original condition.<sup>26</sup>
- Repairs undertaken at the same time as improvements may qualify for deduction under section 11(d) if they can be clearly and separately identified from the improvements. Much will depend on the facts of the specific case and the taxpayer will bear the onus of showing that what was undertaken was a repair. In ITC 1457<sup>27</sup> the taxpayer converted residential flats on the upper floor of a two-storey building into offices after the flats had fallen into

<sup>22</sup> ITC 491 (1941) 12 SATC 77 (U).

<sup>23</sup> *Rhodesian Railways v Collector of Income Tax Bechuanaland* 1935 AC 368, 6 SATC 225.

<sup>24</sup> ITC 617 (1946) 14 SATC 474 at 476

<sup>25</sup> In ITC 1408 (1985) 48 SATC 21 (T) the taxpayer replaced the brickwork façade of a commercial building which had deteriorated to the point of requiring replacement of the defective design and workmanship. It was replaced with a façade made of different materials. The court held that the brickwork, although an essential part of the structure, was subsidiary to it and that it had deteriorated to such an extent that its replacement was essential and the construction of the new façade amounted to a repair and was deductible.

<sup>26</sup> ITC 361 (1936) 9 SATC 189 (U); *CIR v African Products Manufacturing Co Ltd* 1944 TPD 248, 13 SATC 164.

<sup>27</sup> (1989) 51 SATC 131 (T).

disrepair. A quantity surveyor could identify certain of the work as repairs. The court found that the work so identified comprised repairs notwithstanding that it had been undertaken at the same time as the overall improvements. The amounts in question were in fact severable from the overall improvements and were allowable under section 11(d). Similarly, in ITC 915<sup>28</sup> certain work done in the process of improving a roof was accepted by the court as repairs on the basis that it could be separately identified from the improvements.

- The addition of something to an asset that was not previously there will usually be considered to be an improvement rather than a repair. The underpinning of foundations to remedy cracks in a building,<sup>29</sup> the strengthening of retainer walls by the construction of new beams<sup>30</sup> and the replacement of an existing solar heater with a better one<sup>31</sup> were held to be improvements because something was added that was not there before.

#### 4.1.6 For purposes of trade or for which income is receivable

In respect of repairs of a property, a distinction is made between property occupied for the purposes of trade and property from which income is receivable. The reference to the word “receivable” in section 11(d) has the effect that repairs will be deductible regardless of whether income was received during the relevant year of assessment or not, as long as the property is capable of generating rental income during that year of assessment.

The preamble to section 11 clearly states that deductions will be allowed against the income derived by a person when determining the person’s taxable income from carrying on any trade. It follows that the taxpayer must have carried on a trade in order to qualify for the deduction of repairs.

In ITC 243<sup>32</sup> the cost of repairs to a building was incurred before the letting of the property. The cost of repairs was allowed as a deduction. In this case rent was received during a portion of the year of assessment in which the repairs were effected. The court held, allowing the appeal, that the meaning of the word “receivable” was “capable of being received” and that it was not necessary for the admission of the expenditure as a deduction that there should be in existence an agreement for the receipt of income.

In ITC 1475<sup>33</sup> the taxpayer had vacated residential premises with a view of earning income from those premises. Whilst the premises were empty, expenditure was incurred on repairs in order to render the property attractive to a prospective lessee and in anticipation of finding one. The court held that trading had commenced and that expenditure was accordingly deductible, but issued the warning that a determination as to when trading has commenced for this purpose must be made in the light of the facts of the case.

<sup>28</sup> (1960) 24 SATC 219 (F).

<sup>29</sup> ITC 1213 (1974) 36 SATC 113 (R).

<sup>30</sup> ITC 626 (1946) 14 SATC 530 (U).

<sup>31</sup> ITC 1263 (1977) 39 SATC 120 (R).

<sup>32</sup> (1932) 6 SATC 370 (U).

<sup>33</sup> (1989) 52 SATC 135 (T).

#### **4.1.7 Spare parts used in repairs**

Paragraph (a)(iii) of the definition of the term “trading stock” in section 1(1) includes in that definition “any consumable stores and spare parts acquired by the taxpayer to be used or consumed in the course of the taxpayer’s trade”. The effect of deeming spare parts to be trading stock is to bring them into section 22 with the result that the deduction is effectively deferred until the spare parts are used and no longer included in closing stock.

#### **4.1.8 Treatment against the attack by beetles**

Section 11(d) permits the deduction of the cost of treatment against beetle infestation of timber forming part of premises used for purposes of trade or for which income is receivable. Such expenditure will be deductible irrespective of whether it has been incurred during an initial protective treatment or in the course of replacing infested woodwork.

#### **4.1.9 Limitation of section 11(d)**

Section 11(d) is limited by section 23H which provides that where any person has incurred any expenditure, which was or will be allowable as a deduction under section 11(d), amongst others, the amount allowed to be deducted in any year of assessment shall be limited to the expenditure relating to goods supplied or services rendered during the relevant year of assessment.

An example will be where a taxpayer purchases replacement parts for a delivery vehicle in need of repair and pays in advance for the goods, but only half of the goods are delivered by year-end. The taxpayer may only deduct so much of the expense relating to the goods actually delivered, the remaining amount will be deducted once the goods are delivered in the next year of assessment.

### **5. Conclusion**

In order for an asset to be repaired, there must be damage or deterioration to a part of the original asset or structure and the intention of the taxpayer must be to restore the asset or structure to its original condition. Because there are no set criteria as to what constitutes a repair and only principles derived from case law, each case will have to be determined on its merits.
